

SHUBHAM PALKE

QA Automation Engineer (SDET)

Pune, India | +91-7263936312 | shubhpalke@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

QA Automation Engineer (SDET) with 2.10+ years of experience in manual and automation testing across SaaS, telecom, and e-commerce platforms, including web and mobile applications. Skilled in designing and maintaining scalable automation frameworks using Java, Selenium WebDriver, Playwright, TestNG, and REST Assured for Web UI and API testing. Improved regression execution efficiency by 30% through reusable framework components and Page Object Model design. Experienced in Agile/Scrum delivery, CI/CD pipeline integration (GitHub Actions, Jenkins), and cross-functional collaboration with developers, product managers, and QA stakeholders to deliver high-quality, on-time releases.

CORE TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, C++

Automation Tools & Frameworks: Selenium WebDriver, Playwright, TestNG, Cucumber (BDD), Maven, Apache POI, Page Object Model (POM)

API Testing: REST Assured, Postman, JMeter (Basic)

Mobile Testing: Android & iOS App Testing, App Installation, Cross-Device Testing

CI/CD & Version Control: Git, GitHub, GitHub Actions, Jenkins (Pipeline Setup & Job Execution)

Testing Practices: Functional, Regression, Smoke, Sanity, UAT, SDLC, STLC, Defect Management, Agile/Scrum

Databases & Cloud: SQL, MySQL, AWS (Exposure)

Project Management & GenAI: Jira, Trello, ChatGPT, GitHub Copilot

PROFESSIONAL EXPERIENCE

QA Executive SDET – Height8 Tech

May 2025 – Present

Height8 Tech | Gujarat, India

- Developed and optimized end-to-end automation scripts using Java, Selenium WebDriver, TestNG, and Maven with Page Object Model (POM), improving regression execution efficiency by 30%.
- Designed and executed functional, regression, smoke, and UAT test cases for business-critical telecom billing and inventory applications.
- Applied OOP concepts such as Encapsulation, Inheritance, Polymorphism, and Abstraction while designing reusable and maintainable Selenium automation components.
- Used Java Collections Framework including List, Set, and Map for handling test data, web elements, duplicate values, key-value configurations, and dynamic data in automation scripts.
- Built reusable automation components for WebDriver management, reporting, logging, and test data handling to improve scalability and maintainability of the framework.
- Automated critical regression and smoke suites integrated into CI/CD pipelines, enabling faster execution and early defect detection across releases.
- Performed API testing using Postman to validate backend workflows, business rules, and data integrity.
- Automated end-to-end plan renewal flows, including OTT and video offer subscriptions, verifying correct plan activation after successful payments.
- Tested payment processing and billing scenarios for plan renewals and upgrades, including date-based renewals and post-upgrade validations, ensuring billing accuracy and service continuity.
- Validated inventory and warehouse management workflows, including stock request creation and stock transfers between warehouses.
- Led UAT support activities, coordinating with business users and stakeholders to validate acceptance criteria and confirm release readiness.

- Collaborated with developers, product owners, and business analysts in an Agile/Scrum environment on defect triage, root cause analysis, and test strategy.
- Leveraged GenAI tools (ChatGPT, GitHub Copilot) to accelerate test case design and automation script debugging.

Quality Assurance Automation Engineer – AI Variant

Jan 2025 – Apr 2025

AI Variant | Bengaluru, India

- Developed and maintained scalable automation frameworks using Java, Selenium WebDriver, and TestNG following Page Object Model (POM) design pattern.
- Automated functional and regression test cases, reducing manual testing effort and improving release efficiency.
- Performed data-driven testing using Excel/JSON and TestNG Data Providers.

Quality Assurance Engineer – Spidrontech

Jan 2023 – Feb 2024

Spidrontech | Pune, India

- Authored test cases from user stories and coordinated with developers for quick defect resolution.
- Developed end-to-end automated test cases using Selenium WebDriver with Java for web-based e-commerce features.
- Participated in regression cycles and feature testing for monthly releases across multiple geographies.
- Executed regression, functional, and integration testing; reported and tracked defects using JIRA, ensuring timely resolution.

KEY PROJECTS

H8SSRMS – Telecom Billing & Inventory Management System

- Automated end-to-end plan renewal workflows with payment verification, covering date-based renewals, plan expiry, and video/OTT offer plans across API and Web UI layers.
- Designed and executed automation for the inventory warehouse module, covering stock request creation and end-to-end stock transfer flows with quantity and item validation.
- Performed cross-module validation to ensure seamless integration between billing, payments, and inventory systems.
- Managed the full defect life cycle including logging, daily triage, retesting, and closure validation.
- Prepared test summary reports and provided formal test sign-off supporting UAT release readiness and go-live decisions.

Web & Mobile Application – Cobagage

- A multifaceted travel-based web application where users can post trips, list luggage, sell/donate items, or send packages with travellers we also sale products on this website through.
- Conducted end-to-end functional, integration, and regression testing.
- Automated test cases for key modules using Selenium WebDriver and TestNG.
- Validated admin panel operations like user management and subscription plans.
- Performed cross-browser and responsive testing to validate application functionality and UI consistency across different browsers, resolutions, and screen sizes.
- Verified mobile application behaviour on Android and iOS during app installation, launch, background/foreground transitions, logout/login, and session handling.

EDUCATION

Bachelor of Engineering – Computer Engineering

Suman Ramesh Tulsiani Campus of Engineering, Kamshet, Pune | 2019 – 2022 | CGPA: 9.04

CERTIFICATIONS & ACHIEVEMENTS

- Software Testing & Automation (Selenium with Java) – ExcelR.
- Manual & Software Testing – QSpiders, Wakad, Pune (STLC, Test Case Design, Defect Life Cycle, SQL, Agile)
